OLDEST NURSERIE IN THE WEST-ESTABLISHED 1825

LARGEST NURSERIES IN THE WORLD-27 IN 6 STATES

This Price List is our authorized salesman. We do not want to do business except to our mutual advantage. If any order is unsatisfactory, no matter whose the fault, we are prepared to make, it satisfactory. If the satisfactory is the satisfactory of the satisfactory is the satisfactory of the satisfactory is the satisfactory of nothing but the best trees that can be grown at a fair price.

TERMS :- One-fourth cash with order, balance on arrival. 5 per cent discount for cash with order; no discount allowed unless cash in full is received with order.

This 5% (added to Premiums for cash), is an item worth saving; for \$95 pays for \$100 worth of stock and \$950, for \$1000 worth: please consider this in comparing prices, also that we pay freight, etc., etc., etc., and-grow trees as they ought to be grown. Also note **Premiums** page 16 for cash **in full**. Kindly make all remittances payable to Stark Bro's N. & O. Co., at Louisiana, Mo.

CLUBS will be supplied at these close list prices-from which deduct on each order a Discount of 5 per ct. if you send all cash with order; and then 3% for the Club Maker: Each order will be tagged and tied separately to facilitate easy and quick distribution without errors to each customer by the Club Maker, and then all boxed or baled together and shipped for distribution to Club Maker-who, for his work in getting up the club, receiving and distributing, will be given a cash commission of 3% on the total amount of cash received, but not including his own order; or, in lieu of cash, he will be given 5% in Nursery Stock.

SPECIAL Prices on large lots, BUYER to pay freight, boxing, etc.

### Stark 12 CHALLENGE Points :

We PAY FREIGHT on everything as priced herein, to any R. R. Station in U. S.

We do NOT pay charges on express shipments; for it is wasteful to express strong, dormant, well packed trees; they go as safely by freight as by express and much cheaper—unless order be small, say 15 to 20 lbs., when express is often as cheap as freight:

On Orders Amounting to \$7.50 or more, if 1 or more cash is sent with the order, we will prepay freight to any R. R. Station in Ark., Ind., Ills., Iowa, Kans., Mo., Neb., Ohio.

We Box and Pack FREE—bear cost of boxes, bales, moss, fibre, etc. Expensive, but good packing pays—pays customer, pays us.

PAPER LINE all boxes at all seasons—another costly item, but it is a safeguard against both drying and freezing.

Replace any trees which may fail to live, at one-half the current "Each" price, provided trees shall have been properly planted and cared for and we are notified by Aug. 1, next after planting.

Give wholesale prices, and ship direct; ours are the lowest priced Nurseries on Earth for best quality trees of best varieties, —sent world-wide during 80 years and more.

Give 10 trees of one sort at the 100 rate; 300 of a KIND (as 300 Apple, or 300 Plum, etc.) at the 1000 rate.

Give buyer his choice of sorts. If requested we make selections, using our best mind and experience in his interest.

**Guarantee all stock** to be carefully packed and in good condition at time of shipment. After taking receipt from Transportation Co. for stock in good order, our responsibility ends; should loss or damage occur, claim should be made at once on Transportation Co.

Guarantee trees true to name, and use utmost care to avoid mistakes, but should any prove untrue to label we will, upon proper proof, replace the trees free; but are LIABLE no further. Our just and liberal dealing during 83 years is our chief guaranty to customers.

Guarantee trees free from San Jose Scale, Yellows, Rosette, etc. Our nurseries, annually inspected, are free from injurious insects and diseases. Entomoligists' certificates on ALL shipments.

Guarantee trees of HIGHEST Quality—you can't get better ANYWHERE at ANY price. Stark Trees are grown to last, and bear—the best fruits known. Young, healthy, thrifty 1-or 2-yr. stock even if a small size, is very different from small, old, rough, stunted trees culled from 4- and 5-yr. blocks.

Guarantee SATISFACTION; if any order is unsatisfactory, we will gladly make it satisfactory. And remember, the value of a Guaranty is not in WHAT is said, but in WHO says it.

Ten (10) Trees of one sort at 100 rate—as 10 Delicious, or 10 Gold, or 10 Alton, or 10 Kieffer, etc.; 300 of a KIND at 1000 rate—as 300 Apple, or 300 Peach, or 300 Plum, etc.—no matter how many sorts or sizes, if not less than 10 of any one sort.

#### Less than 10 Trees of a sort ALWAYS at Each rate.-

Example: In an order for 320 Apple-100 Black Ben XX, 2-yr., 85 De-Hicious 3 to 5 ft., 1-yr., 115 Jonathan XX, 2-yr., and 20 assorted (1, 2, 4, 7, etc., of a sort), latter 20 will go at Each rates, the 300 at 1000 rates. Different kinds, as 150 Apple and 150 Plum, cannot be taken together to make up 300 so as to obtain 1000 rate.

We uniformly tie TREES in bundles of 10; GRAPE VINES and SMALL FRUITS in bundles of 25; and as unbroken bundles are handled at less expense we can thereby afford these UNUSUAL concessions.

THREE Sizes of 2-yr. fruit trees are made in our packing cellars: XXX Size is the size sure to please. XX Size excels "1st class" of some nurseries. Each size is 1st class of that size: no second class, defective or cull trees go into any size, but to the brush pile.

Trees of beautifully uniform size and height can be had, and of "all" varieties; but in the final test of FRUITING-they all bear one inferior sort. Trees of a fine-growing variety can often be produced cheaply. But trees grown to sell cheap, are often most dear to plant.

**Our I-Year** trees also are usually graded into two sizes—3 to 5 ft., and 2 to 3 ft.; sometimes 1 to 2 ft. Each size full and strong; our 2 to 3 ft. size equals the largest 1-yr. of many nurseries.

Claims for Errors, etc., must be made within 6 days.

CHERRY  Each   10 [ 1000 ] 1000
$\begin{array}{c ccccccccccccccccccccccccccccccccccc$
<b>TWO-YEAR</b> XXX, 4 to 6 ft 60¢ \$5.50 \$55 \$380 XX, 3 to 4 ft 50¢  4.50  45] 310
(X, 2 to 3 ft  40¢  3.60  36  240 *Dyehouse *Montmorency King *Royal Duke, the * Carly Richmond * '' Large best Duke English Morello * '' Monarch *Suda Hardy *German Ostheimer * '' Stark *Terry Early (not the old Ostheim) * '' Sweet *Wragg.
Montmorency is extraordinarily prolific, hardy, worth all other cherries yet known. We propagate from five different strains of fruiting trees, all of the best types—the Monarch from Iowa; the Large from Dansville, N. Y.; the King from N. Y., but grown here for 20 years; the Sweet from a tree yearly flocked to by the children because of its sweeter cherries; the Stark from a selected tree which uniformly bears very large and late fruit. Another "Large Mont." rec'd from N. Y. and Ill. in 1881, is valueless here; 20-year trees have never yielded even a quart per tree, while the Montmorency King trees of same age have never failed to bear good crops, some seasons over 40 gallons a tree.
$\begin{array}{cccccccccccccccccccccccccccccccccccc$
(X
TIMME CHERRY: Ripens about with Early Richmond but larger, better quality, better bearer. Mr. F. O. Harrington of Iowa County, Ia., has had it 16 years and says: "Hardier in tree and fruit but than Early Richmond fruit larger, flesh much more meaty; materially richer in juice and flesh. In 15 years' fruitage not another variety has produced even nearly as many cherries, nor fruited as many seasons." Later, June 26, 1908: "Tim- me is about the only cherry growing a full crop, with me, and they are loaded. The best all round cherry I know of. Tubbs has disappointed me time and again, never borne much; leaf much subject to disease."

ALTON is a fine peach, averages large, a little larger than Carman, better in quality-one of the best I ever tasted. Alton, Carman, Hale E'y, Slappey, ripen at same time. Had some very fine Arp Beauty; averages good size, good in quality, beautiful color; a little soft. Arp. B., Alton, Graves, Elberta and Salway, my5 finest peaches.—F. L. PHELPS, Umatilla Co., Ore. ALTON Peach maintains its good record; proved more hardy last winter than any other. Has fruit on it now, when none on any other. Illi-nois the best blackberry out. -E. A. Richl [Ex-Pres't III. Hort. Sac.] Altan, III.

ILLINOIS Peach originated with Mr. E. H. Riehl, North Alton, Ill., Hort. Editor Colman's Rural World, than whom there is no better authority on peaches. Mr. Riehl says, "the original tree came up within 2 ft. of an old Editor Connaria Ruhar world, that which there is no not be up within 2 ft. of an old Heath Cling, grew up thru the original tree came up within 2 ft. of an old Heath Cling, grew up thru the branches of the parent tree and was soon larger of the two. Bore abundantly when quite young, producing fruit of largest size, in quality perfection itself. Perfectly free. I re-gard it as far superior to anything else in its class. Doubtless a Washington-Heath Cling cross: the very best of parentage."

Later, 1908: AMERICA Plum is the only one that has set a full crop,—as in 1907. "Peaches: Belle of Ga., Carman, Greensboro, Washington, full crop; Elberta, Champion, Early Belle, half crop; many others, total failure."

With us, here in La., Mo., 1905-6, 7, 8, we've had 4 full crops, on Alton. Carman, 2 days later than Alton-which is of the Persian type, not of the Chinese Cling family-rots more, has larger pit, less color, is watery and lacks the rich fragrance of Alton-an excellent market and canning peach, vinous, perfumed, most refreshing. Eureka is fine, sweet and sure; follows Greensboro. Worth finest in quality of all yellow-fleshed sorts; almost as large as Elberta, much hardier, sure cropper, week earlier; for jucies, richer and more delicate in flavor. Washington, our old favorite since 1859; tree very long-lived; fruit vinous and of highest quality. Sea Eagle Improved, season of Stephens R. R., Fox Sdlg., Crothers L., etc., and far finer; it and Alton are the hardiest peaches known. Belle Ga. and Krummel have given four ½ to full crops; Champion, four ¼ to full crops of fine fruit. Elberta, three ¼ to ½ crops.

APRICOT   fach   10   100 [ 1000
APRICOT         fach         10         100         100           Usual Sorts $\begin{cases} XXX, 5 \text{ to } 6 \text{ ft} \dots \\ XX, 4 \text{ to } 5 \text{ ft} \dots \\ 3 \text{ to } 4 \text{ ft} \dots \\ 25 \notin \\ 230 \text{ 230 } 231 \text{ 150} \end{cases}$
*Blenheim *Montgamet *Superb *Early May Moorpark *TILTON. TILTON. This new apricot has a fine Pacific coast record "Its large
size, rich apricot color, high flavor, uniform ripening, sure and unusual productiveness, with frost resisting qualities, and vigorous growth, easily place it far in advance of all other varieties. For drying or canning it is much superior to any of these older sorts."
$\begin{array}{c ccccccccccccccccccccccccccccccccccc$
*COLORADO *STELLA COLORADO APRICOT: From the Grand Valley, Colo., where it is preferred to all others. Freezes back less than any other sort, and the fruit ripens from 8 to 10 days earlier which secures top market prices. Tree is the heaviest bearer and fruit the largest of all apricots grown in that vicinity. Prof. Fred Halverhout, Mesa County, Colo., an experienced commercial orchardist says: "Have some very large and good other varieties of apricots but all are later and not quite as large as CoLORADO. I think it is the best I ever saw anywhere and you can recommend it, at least for the western slope. Ship me 100 CoLORADO trees next spring." STELLA APRICOT: Originated by the late Theo. Williams of Neb. "Unsur- passed for productiveness, size, color and quality. Strong grower, large, beautiful foliage, enti. ely hardy in Nebrask awhere very few apricots will stand. Has produced a crop following a temperature of 35 degrees below zero. Late bloomer. In the STELLA we firmly believe we have the hardiest Apricot of good quality ever offered the public. Am sure of one thing; this apricot is hardier than arples, cherries, plums, etc. Have just examined the Stella tree on a ladder to the top, and find apricots all over the tree to top, 3 or 4 in a clustor in a bunch."
<ul> <li>One-year Peach or June Buds? As to comparative longevity of one-year and June budded peach trees, will state that in two carefully made tests there was a very marked difference in favor of the one-year trees. The June buds were most prompt to start, and for first four years' growth, as well as for the first and it wo or three subsequent crops, they invariably lead the one-year; but their vigor waned from such period onward, so that in point of orchard value, the one-year trees were 50% to 75% more productive. And even after the June buds had completely exhausted themselves the one-year trees were profitable for double the length of timeJ. W. KERR, Caroline Co., Md., May 6, 1908. [Mr. Kert has one of the largest experiment orchards in the U. S. He has over 1200 varie ies of fruit on his farm, and his opinions are based on what he has actually demonstrated—not on theorySTARK BROS.]</li> <li>LARGE PEACH TREES As a general proposition I want a large peach tree, and plant lots of them 6 and 8 ft. high. I used to try and make myself believe I wanted small trees, but experience has shown me that I do not. I want good big ones. I cut the top off at a height of 18 inches or 2 ft. and remove the side branches. If only one bud puts forth it is apt to discourage the planter, but itshould be allowed to grow. The n-xt senson cut it back, leaving 3 or 4 buds, and it will put forth shoots which will make a fine top for the low-headed tree. Yes, I want big peach trees, and know they are best for the ceneral planterJ. H. Mak. the "Peach Kim," in Fruitfiower.</li> </ul>

STARK GRAPE NURSERIES at Portland, N. Y., are in the heart of the fa-mous Fredonia-Chautauqua Grape Belt, which ships more carloads of Grapes and produces finer vines than any other locality in the U. S. FIRST CHOICE sorts are in black type, as WORDEN, Houghton, Snyder.

PLEASE NOTE PARTICULARLY that Small Fruits and Grapes are tied in bundles of 25; hence we do not sell less than 25 of one sort and age at 100 rate-as 25 Houghton Gooseberry, or 25 Concord Grape, etc.; less than 25 of one sort and age will always be sold at Each rate—as 3 Brighton grape 1-yr. for 30%; or 14 Cuthbert Raspberry for \$1.12; 25 of one sort at 100 rate; 300 or more of one sort at 1000 rate-as 300 Cuthbert for \$3.60.

Our aim is to aid the wide planting of every tree pleasant to the sight and good for food, that all men may inherit the Green Earth: and every man sit under his own vine and-Delicious apple tree!

**DELICIOUS**—The original Delicious tree, near Des Moines, Iowa, is 26 years old; 40 degrees below zero killed most other sorts of same age, on the flat black prairie soll where it stands, yet the Delicious has given 20 successive crops without a failure. Quality absolutely the finest known,—tender, delicate, "delicious," and absolutely different from all other apples. Will please the most delicate taste—no pear more delicious.

The old Delicious tree has never failed to bear, but in 1907, was a light crop.-S. L. HIATT, DES MOINES CO., IA., owner of original tree of Delicious. DELICIOUS stood the winter well, though tops of several other varieties

were killed back. Delicious is better than McIntosh for this cot -W. J. SAWYER, Yellowstone Co., Mont. this country.

**DELICIOUS** is the apple sold by Oscar Vanderbilt, Hood River, Oregon, at \$6.00 per bushel box.-WESTERN FRUIT GROWER.

- \$6.00 per bushel box.-WESTERN FRUIT GROWER. Our Washington representative, Mr. T. H. Atkinson, of Wenatchee, writes, 1907: "Many of the growers here are holding their Delicious for \$3.50 per box orchard run. The Black Bens are simply beautiful. People are very enthusiastic about Delicious and those who see King David predict a great future for it: I have seen specimens and they are unquestionably KINGS-have never see anything finer. Eastern buyers are picking up all the higher grades of apples here. Delicious brought the highest price of any apple in the valley. I would not have believed what I see every day. A man I have become acquainted with is taking off a \$20,000 crop from a 20 acre orchard. he will net, at least, \$17,000 or \$15,000 and this off of seven-year old trees. He did nearly as well last year."
- MR. JOHN CLARY, Santa Cruz County, Ariz., to publishers THE WESTERN FRUT-GROWER: "Enclosed find \$1.00 for subscription. Am a patron of Stark Bro's and just a short time ago received 100 trees from them. I think Stark Nursery is the **only up-to-date nursery** in the country. Have Delicious, King David, Senator, Black Ben, Stayman Winesap, etc., all from them and doing fine."

RHUBARB, Mvatt Linnæus, BEST; strong roots 109	5.00	30.00
HORSE RADISH	4.00	20.00

Asparagus is usually planted on light soil to have it early, tho easily grown on all good garden soils. Sprouts are not usually cut until the 2d or 3d year after planting, except to mow down the canes in the fall. Roots will give good crops 15 or 20 years. Cut sprouts 4 or 5 in. under ground, and when only 2 to 4 in. high. Plant roots in spring or fall, 4 to 6 linches deep; cover with only 3 in. of soil at first; and fill in the trenches as the plants grow. Cutivate well at first; afterwards only in the spring and in July and Aug. Salt spread broadcast early in spring, about 5 to 10 bushels per acre, is a good fritlizer; give good top-dressing of stable manure in Nov., 200 to 400 pounds per acre of nitrate of soda in March.

**GONZALES** astonishes all.--f. T. Ramsey, Iravis Co., Tex. Considering the fruit healthfulness and bearing qualities, Gonzales is one of the best of all plums.--jas.S.ker, Grayson Co., Tex.

## ROOT GRAFTS-APPLE, Crab, Pear.

Root Grafts are scions and roots grafted ready for planting in nursery rows. Grafting season begins in Dec., closes in March. Grafts shipped in winter are packed in paper lined boxes to prevent freezing; they weigh about 25 bs. per 1000, and expense of transportation is small. Keep in a cool, dark cellar. Prepare the ground well, and plant about 15,000 per acre, as soon as frost is out in spring; allow but one bud to project above the surface, and firmly press the soil, particularly about the root and union, being very careful not to disturb the union.

Whole-Root Grafts are grafted at the **natural crown** and then roots properly pruned back, so that they will produce the best possible trees.

- Stark Grafts are put up by experienced men who are paid by the day, and not by the 1000, and we have large orchards from which to cut scions. Nevertheless, we must advise orchard planters and those inexperienced, to buy trees, even if small size, instead; they will get orchards quicker and more certainly. For practical tree growers, Apple, Crab, and sometimes Pear grafts, are well enough. Stone Fruits, etc., we grow by budding.
- **Order Early** to insure Graft orders being filled. To secure good stand early planting is necessary. Trees plant successfully after it is too late to plant grafts. Grafting season usually closes in March.
- N. B. Grafts are supplied without any guarantee whatever other than that they will be true to label, and be delivered to transportation company in good condition. If not received in good condition claim must be made on Transportation Co., not on us; we cannot replace, nor can we be beld responsible in any way for grafts that fail to grow; quality and condition of soil, season, proper planting, care—all and each of these has everything to do with their success.
- All Stark Grafts are made to SPECIAL ORDER and as ordered, then packed separately till time to ship. We do not make up Grafts ahead of orders, nor to carry in stock—except for our own planting.
- Cheaper Grafts can be made if wanted—in lots of 5000 or over. But neither the material nor workmanship will equal that we use in Grafts made for our own use—which is the **Best**. And Stark Grafts to fill your order will be exactly the same. Even if you order Piece-roots you will get the **best** Piece-root Grafts that can be made.

small quantities. Not less than 500 of one sort will be supplied at 1000 rate.

Grafts are Tied in bundles of 100 as made, with label on each bundle; if ordered in any quantity less than 100 of a sort, the 10 rate must apply to cover the extra time and labor required in making, tying and labeling small quantities. Not less than 500 of one sort will be supplied at 1000 rate.

CHAMPION, Stayman W., Black Ben, Ap. of Commerce, good growers, set fruit well and plentry of it; very few small apples. Senator not as thrifty in tree, very little fruit, but of good size. Grimes Golden and Jefferis, thrifty trees; have set fruit sparingly. E'y Melon good grower, sets plenty of good size fruit. Sultan and Burbank too tender here; late frosts kill are subject to black knot, Climax will not hang on the tree. Gold and America do fairly well. Shiro and Red June are better adapted to this climate than any of the others. No peaches are hardy enough here. Rossney is my best pear. Alamo also good. None of the Clapp type succeed. Garber, Kieffer and Ozark are bearing a few pears. King Karl is both the largest pear and bears more fruit than any other,--FBANCES Cony, El Paso Co., Tex.

NEW HYDRANGEA, Arborescens Grandiflora (Snowball Hydrangea): A grand addition to hardy flowering shrubs. Comes into bloom just when there is a scarcity of white flowers—in July and August. Makesa shrub much like the common Hydrangea (pan. grand.), but with purest snow white flowers, much like snowball, but much larger and more showy. Unapproached in floriferousness, duration of bloom, and value as single specimens or in groups.

- LIVELAND RASPBERRY is the finest, most beautiful, very early apple; ripens with Yellow Transp't, but covers much longer season. Quality absolutely best, both for eating fresh and cooking.
- **STARK SUMMER QUEEN:** Ripens ahead of Wilson June and covers the latter part of Carolina Red June season. It is a very remarkable apple though it has not been fruited except on original tree, which is about 18 years of age, and on some top worked trees. A seedling of Early Pennock but **earlier** and **decidedly better in quality**; about the same size
- WILSON JUNE (San Jacinto): Like an enormously large Red June apple, of which it is a cross, coming in just as the Red June goes out. Tree vigorous, hardy, exceedingly young bearer, prolific; 4yr. trees July 23. 1906, had 8 to 15 large ripe apples, looking like fine Black Ben; five 9-yr. trees yielded 27 bu.; brings highest prices. Kansas City Commission house wrote J. F. Bain, Lincoln Ark.: "Ship me more of those fine Red Apples." A variety of the highest merit both for market and table. Fruit hangs to the tree remarkably well and a fine keeper for an early apple. Fortunate will be the orchardist who gets an early start of this apple. Origin Washington Co., Ark., many years ago; first grafted and sent out for trial in 1893. Has been called San Jacinto in Texas and given several other names elsewhere.
- SUMMER CHAMPION: Comes just about a week later than Wilson June. Resembles a well-grown Ben Davis both in quality and flavor, Tree of remarkable vigor and bearing qualities. A great early market apple.
- JEFFERIS "samples sent you 2 years ago, and we send again; begin to ripen July 15, will hang till Sept. 1, if not picked. Codling moth rarely ever bothers them. Examine closely; we are very anxious to know for certain what they are."—W. G. RUTON & SONS, Chaves Co., N. M.
- **DELICIOUS** is undoubtedly the greatest apple in general cultivation to-day, and King David, wherever tested, is creating a sensation.
- A WORD OF CAUTION. As usual when a fruit of special merit is introduced spurious substitutes are plentiful. We have reliable information that in consequence of the great demand for Delicious and others of our improved sorts, some irresponsible nurserymen and dealers have offered, and are even propagating, trees claimed to be genuine, or "just the same."

sorts, some irresponsible infrserymen and dealers have offered, and are even propagating, trees claimed to be genuine, or "just the same." Those offering trees under the name of Delicious, King David, Black Ben, etc., (usually at a lower price as an inducement for the order,) are, on the face of it, infringing on our legal trade-marks; and one who will stoop to infringement will not hesitate to substitute spurious strek labeled to suit the order. In not one case in fifty do such sharks furnish a single genuine tree of scarce, valuable sorts.

# ROSES, 2-yr., Field Grown

NORTH of St. Louis and only 64 miles south of Keokuk, IOWA-and not "near New Orleans"-is LOUISIANA, MO., named soon after, and for, the great "LOUISIANA PURCHASE."

Our Mr. W. P. Stark who, with Mr. J. M. Irvine, of THE FRUIT GROWER, is on a six weeks' trip in the N. W., writes from Nampa, Ida: Our old friend, Silas Wilson, located here, and I've been with him today, seeing orchards. This is a great fruit country—and yet, as usual, the best hotels are without fresh fruit. At St. Louis World's Fair Mr. W. put up a good exhibit for Iowa and captured more medals than any other state. He has been a judge at various State and other fairs, and will plant largely himself. Advocates planting One-year trees, and says Stark Trees have the best root system, that we are the best propagaters, and have the best system, methods, and facilities, and that no nurseries in the irrigated val-leys can compete with our Mo, conditions for producing good stock. The prize Spitzenburg at Paris were from Weiser, Ida., altitude some 3000 it. There a good mony Delicious are grown, Mr. W. says, and at one of the fairs Frof. Shirin asked him to name an apple labeled "Unknown," as it was delicious. Mr. W. replied: "You've named it—Delicious!" Mr. W. brought a box home and says every one went wilde over them. It is the same story everywhere. Mr. Kent, of St. Louis, was raving about them when ta king with Mr. Irvine. We will need another carload as samples for distribution this winter. Off for Oregon tomorrow.

#### **KNIVES**—Postpaid

Stark Budding, and Pruning and Grafting knives are made from our own patterns, hand forged, by the best Cutlery Co. in America. We especially stipulated in contract for highest quality. They prove the best knives ever used in our Nurseries Prices NET CASH: Stark Pruner and Grafter is the best knife for Grafting and

for light Pruning-in short, an all purpose knife.

### TREE PROTECTORS (Pat'd Jan. 1, 1901.)

Best Device we have ever seen for protecting trees from rabbits, illustrated herewith. Has all trees from rabbits, illustrated herewith. Has all good points, and more, of wooden, paper or corn stalk wrappers, without their faults. Easily and quickly put on or removed. Can be left on **3 to 5 years**, then used again on younger trees; made of best galvanized wire and indestructible. Do not exclude light and air thereby making the bark tender, etc; do not harbor mice or insects. Prices, NET CASH, subject to change in price of wire: 100 Protectors . \$ 2.25 19.50 1000 Protectors 10,000 Protectors......per thousand, 17.50 50 at 100 rate, 500 at 1000 rate, 5000 at 10,000 rate.

Premium No. 25 is the largest, and all, we can give for any order no matter how large. Club orders are entitled to but one Premium.

N. B. Please note, customers must mention the premiums on their orders themselves; we cannot look after it. If not specified, premiums may not be sent and we cannot be held responsible. So please be SURE, after order is made out and figured up and the amount known, to enter (preferably using blank on Order Sheet) the No. of your Premium, as "Premium No. 5, for ALL cash"—See ORDER SHEET.

CUSTOMER FOR 50 YEARS: Quote us 1- and 2-yr. Delicious. Geo. W. Bowman, who bought Delicious for 15 acres, is my son-in-law, and it was I who recognized a tree here as Delicious, and I am answering a lot of questions about it."—WM. CUTTER, Mesa Co., Colo.

→it takes stones to make a "young saucebox" come down out of Stark Trees. "In the beginning" scions and buds were taken from trees that bore the **most and best fruit**. This plan we still follow. So that many of the strains of Stark Trees are **superior** to the same varieties, "unpedigreed." unselected, unimproved.

Improve the varieties we already have rather than seek new ones-this is our aim. Simply that a sort is new, is against rather than in its favor. Hence we aim to make sure a new sort excels in some way the old ones. Such is Delicious; also Giant Jeniton, Henry Clay, Stark Sum. Queen, Sum. Champion, Wilson June; Fame (best as dw'f), King Karl; Timme; Stella ap't: Omaha, Freestone Goos<sup>+</sup>, etc.
